DATA BASE  
EBS 285

QUIZ 1

30 MINS.

09  
20

- 1.. Before the use of DBMS information was stored using .....
- A. data system
  - B. file management system
  - C. cloud storage
  - D. none of these
2. .... is a computer programme whose primary purpose is entering and returning information from a computerized database:
- A. Database system
  - B. Database application
  - C. Data base Management system
  - D. None of the above
3. In Entity Relationship Diagram rectangles represents.....
- A. Tables
  - B. Attributes
  - C. Data base
  - D. Entity sets
4. Data type can store unstructured data.....
- A. Raw
  - B. CHAR
  - C. Numeric
  - D. VARCHAR
5. In a relational database a referential integrity constraint can be specified with the help of.....
- A. Primary key
  - B. Foreign key
  - C. Secondary key
  - D. None of the above.

2

1.

6. The language used in application programme to request data from the DBMS is referred to as the:

- A. Data Manipulation language (DML)
- B. Data Definition Languages (DDL)
- C. View Definition Language (VDL)
- D. Storage Definition Language (SDL)

7. A Table.....

- A. Cannot be empty
- B. Consist of rows and columns
- C. Consists of Alphanumeric data
- D. Can only store data of one type

8. A relational database consists of a collection of:

- A. Keys
- B. Records
- C. Tables
- D. Fields

9. Combination of one or more columns used to identify particular rows in a relation is a (n).

- A. Record *Foreign key*
- B. Record
- C. Key
- D. Tuple

10. ~~A~~ Form define .....  
~~B~~ Where data is placed on the screen  
C. the width of each field

- D. both where data is placed on the screen and the width of each field.
- A. *None of the options*

**In the statement below indicate as True/False**

- 11. In first normal form, column names can be duplicated..... *True* ~~False~~
- 12. Foreign keys should not be duplicated..... *True* ~~True~~ *False*
- 13. Redundancy of data is associated with the file based system..... *True*
- 14. Attribute in ER diagrams normally become columns in a relational data base..... *True*
- 15. Entities in ER diagrams normally become the table names in a relation..... *True*

Write down or fill in the appropriate answer in the spaces provided

16. Database model shows the ..... ~~blue print or logical~~ ..... structure of the data base.
17. The number of ~~attributes~~ ..... is used to determine the degree of a relation
18. The description of the database is called..... ~~Data Definition~~ ..... ~~Schema~~
19. The process of requesting information from a database is known as ..... ~~query~~ .....
20. The process of entry data in a data base for storing is known as ..... ~~Data Manipulation~~ ..... ~~population~~
