COLLEGE OF DISTANCE EDUCATION

END OF SEMESTER I EXAMINATION-2020/2021 ACADEMIC YEAR

BACHELOR OF PRIMARY & JUNIOR HIGH SCHOOL EDUCATION

BPE & BJHSE YR 2

**EBS 289: NATURE OF MATHEMATICS** 

MUSE GALA MODIE SIGNATURE: PARTITIONES

REGISTRATION NO DIESE GA 9 1100 78 SIGNATURE: 1 100 18 INSTRUCTIONS:

- Provide your EXAM CODE at the front page of the answer booklet. Failure to write your EXAM CODE will result in a score of zero (0) for section A.
- 2. Answer ALL Questions in Section "A" in the answer booklet.
- 3. Answer any two (2) Questions in Section "B" in the answer booklet.

SECTION A

[Answer ALL Questions in this Section]

(20 MARKS

- Which of the following statements are true?
  - □ いります。 トイイイイイ アアア
  - II. 01911 = 113

  - A. I & II only
  - B. I & III only
  - C. II & III only
  - D. I, II & III
- When any two consecutive triangular numbers are added the result is a square number. This statement is
  - A. always false

B: always true

C. neither true nor false

D. sometimes true

#### SECTION B

### Answer any two (2) questions from this section.

- a) i) Distinguish between proper factors and factors of a given natural number? Illustrate each with a suitable example. [8 Marks]
  - Explain each of the following mathematics education terms, illustrating with two examples each: deficient, abundant and perfect natural numbers. [12 marks]
- a) Explain three definitions of mathematics.

[9 Marks]

12-

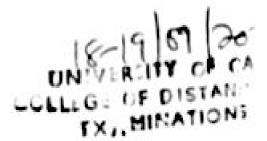

- Explain how you would use prime factorization approach to find the highest common factor of 72 and 120. [11 Marks]
- a) Explain two main beliefs held by the Fallibilist philosophers of Mathematics.
   [6 Marks]
  - b) i) What is meant by an algorithm in mathematics education?

    [2 Marks]
    - ii) Explain, in sequence, how to use HMMDIA algorithm to solve the subtraction problem: 673-87 =? [12 Marks]
  - a) Without using the calculator or long division, determine whether or not each of the following numbers is divisible by 9. Explain your reasoning.
    - i) 33287600327

ii) 14720362814961

(4 marks) (4 marks)

#### **EXAM CODE 02**

b) Explain the following terms, illustrating each with an example:

(i) Direct and indirect isometry;

[6 Marks]

(ii) Congruent figures;

[3 Marks]

(iii) Similar figures.

#### EXAM CODE 02

- C. James Rees
- D. Morris Kline
- Which of the earliest numeration systems was known to have employed only two wedge-shaped characters called *cuneiform*?
  - A. Romans
  - B. Hindu-Arabic
  - C. Egyptians
  - Babylonians
- 10. The letters of the acronym for HMMDIA algorithm stand for
  - A. How Many More Did I Add
  - How Much Money Do I Add
    - How Much More Do I Add
    - D. How Much More Do I Apply
- 11. The historical book authored by Euclid is titled
  - A. Al-jabir
  - B. Cunciform
  - (Elements
  - D. Papyrus
- 12. Which one of the following terms fits the description "a number which has exactly two factors; the number itself and one"?
  - A. Composite number
  - B. Odd number
  - C. Perfect number
  - Prime number
- The assertion that "Nature's great book is written in Mathematical language" is attributed to
  - Sir James Jeans
  - B. Morris Kline
  - Galileo
  - D. Bertrand Russell

TYA		

- 14. The counting on principle stipulates that the learner
  - A counts all objects for the first addend, and then finger counts for the second addend
  - B. counts objects for the first and the second addends and then counts all combined
  - C. makes all objects for the first addend, and all the objects for the second adden
  - states one of the addends and then "finger" counts to represent the second addend
- 15. Any proposition, which off hand appears to be true but is actually false, or which appears to be false, but is actually true is referred to

algorithm

actinomy

axiom

conjecture

16. Which one of the following statements best describes square root of a given natural number?

One of the factors of a given natural number.

One of two equal factors of the given number.

The product of two equal factors,

D. The result of multiplying a number by itself.

17. Two primary sources of Egyptian mathematics were papyri.

A. Rhind and Reisner

Rhind and Moscow

Moscow and Leather Roll

Leather Roll and Reisner

#### EXAM CODE 02

18. Which one of the following mathematics terms is best described as a mathematical proposition whose truth value is yet to be known?

A. Antinomy

Axiom

Conjecture

Theorem

 The famous conjecture "The equation x' x y' x y', where x, y, z are integers is impossible when n is an integer greater than 2" is referred to as

Euclid's Infinity of Primes

Fermat's Last Theorem

Goldbach's Conjecture

Russell's Paradox

20. The proposition that any even number greater than 2 is the sum of two primes is often referred to as

Goldbach's even number conjecture

Fermat's Last Theorem

Fermat's even prime number conjecture

Euclid's infinity of even primes

TIVE PROITAGIM YT

4. a. i. State the principle of mathematical induction.

[2 marks]

- ii. Use the principle of mathematical induction to prove that "the sum of the first n even positive integers is n(n+1). [8 marks]
- b. Use implications to determine whether or not the following argument is valid. "If the teacher's explanation is too long, students get bored. But if students pay attention, they do not get bored. So no explanation is too long for students who pay attention". [10 Marks]
- 5. a. For each of the following,
  - i. abundant number
  - ii. deficient number

[5 marks]

[5 marks]

- $\alpha$ ) explain what it is
- $\beta$ ) give an example of each
- $\theta$ ) give a reason for your answer.
- b. Use implications to determine whether or not the following argument is valid. "If the teacher's explanation is too long, students get bored. But if students pay attention, they do not get bored. So no explanation is too long for students who pay attention"

[10 marks]
